## AlphaFlash®

### The fastest machine-readable economic news & data

AlphaFlash delivers global market moving macroeconomic indicators to algo traders, analysts, asset managers, hedge funds and risk managers operating in automated, low-latency trading environments. It was developed using resources from our fully accredited news agency MNI, whose journalists have direct access to government lock-up rooms and embargoed releases.

#### Key benefits

- Consistently faster and more economical than competitor products
- Designed for easy direct integration into trading algorithms
- Available in data centers across the globe
- More than 200 economic indicators

#### Overview of AlphaFlash data packages

AlphaFlash subscribers can choose between several data packages:

- USA Feed
- European Feed
- Canadian Feed
- US Treasury Feed
- Chicago Business Barometer ('Chicago PMI')
- ISM Feed
- Risk Signal Feed

The regional data packages provide important economic indicators and releases such as central bank interest rate decisions, employment numbers, housing statistics, gross domestic product figures, CPI, industrial output, money supply and more.

The US Treasury data package provides machine-readable announcements and results from US treasury auctions. The Chicago Business Barometer disseminates the 'Chicago PMI' to customers three minutes before it is released to the media.

AlphaFlash ISM delivers the Manufacturing and Non-Manufacturing ISM Reports on Business. AlphaFlash Risk Signal alerts clients of upcoming economic releases.

#### Global sources
